

The Project

For the past 20 years KRS has been Safeway's go-to company for design, consultation, manufacturing and installation. They've challenged us in all aspects of our company and we're honored to be an allied partner every step of the way.

From small scale signage to fully realized environments, we know Safeway. We're not afraid to travel to Northern Canada in the dead of Winter for a site survey. Or stay up all night developing a knockout presentation. Not when we know it will provide a better, more consistent product and strengthen our commitment to them.

As Safeway has grown so has KRS. Since we started doing business together, our staff has grown to include Safeway-dedicated employees in every aspect of our company. Regardless of the project, we have provided them with consistent product, customer service and record of on-time delivery.

We are proud to work with Safeway's corporate offices and all 11 divisions throughout the United States and Canada.

Safeway
